*Directions start on next page.*

## Supplies Needed:

- Cardstock.
- Decorative Scrapbook Paper.
- Ribbon or String.
- Hole Punch.
- Paper Cutter.
- Adhesive to adhere decorative paper. I used a tape runner.
- Optional: You will need a clip if you decide you don't want to do the ribbon lacing.

## Directions:

### Step #1

- Cut cardstock to 3 1/2 inches square.
- Cut decorative paper to 3 1/4 inches square (for back and what will become your side flaps).
- Cut decorative paper to 1 3/4 inch square (for inside top point).
- Cut approximately 12 -14 inches of ribbon for lacing. It depends on if you want to knot it or make a bow. Do one how you like it, then use the measurements for any more than you may make. I liked the look of a knot on mine better than a bow.
- Cut approximately 11 inches of ribbon for your kite "tail". Knot ribbon on one end. I knotted mine twice. You need a large enough knot so that it will not slide out of the bottom of the kite. You will be sliding it inside and out the bottom after your kite is together.

**Step #2**

- Center and adhere larger decorative paper square to one side of cardstock. This will be your "back" piece.

**Step #3**

- Flip your cardstock square over so your plain cardstock side is on top.

**Step #4**

- Score cardstock square on one edge from 1 and 1/2 inches in on down to point. Do the same on the opposite side so that both score lines come down to one point.

**Step #5**

- Adhere smaller decorative square to top point of kite. I left a little cardstock showing on mine.

**Step #6**

- Fold inside flaps that you have scored.

### **Step #7**

- Punch 4 or 5 holes on inside edge of both side flaps. Mine were approximately 1/2 inch apart.

### **Step #8**

- Take your "tail" length of ribbon (knot side on top) and slide it down and out the bottom of the kite through the crack where the side flaps meet. Pull it through. The knot will keep it in place without any adhesive.
- Lace up with ribbon through holes (like a shoe) and knot or tie a bow.

**Tip: Gently squeeze sides (fold edges) to slip in your treat.**

*See next page for quicker instructions using a clip instead of laces.*

## Fast Track Directions

You can skip the hole punching and lacing of the ribbon if you want to fast track these. If you have a lot to make, this would be the way I'd go. Instead of doing the lacing, just clip the flaps together.

The flaps will overlap just very slightly so a clip will do to keep them closed to hold your treat. I used a mini binder clip on the one in the photo below, but you could use a small clothespin or even a large paperclip. You can add a little bow on top of your clip if you want.

### Tag saying ideas for this project:

- Flying high with prayer!
- Fly higher with prayer!
- Flying high with God's Word
- Need a prayer lift?
- Need a faith lift?
- Jesus lifts me higher
- Fly into Spring!
- Do not be afraid to soar!
- I am going up! (using John 14:2 or John 3:16)
- Keep calm and go fly a kite!
- Reach for the sky
- Let your faith soar

- Let your creativity soar
- Let your imagination soar
- It's your time to soar
- You were born to fly
- For Volunteers: Thanks for the lift!
- For Volunteers: Thanks for rising to the occasion
- Women's Ministry: Get carried away with our Women's Ministry
- Thank You: Thanks for lifting me up!
- Thank You: You send me soaring
- Encouragement: Sending up prayers for you
- Encouragement: Hope everything looks up for you soon
- Bible Verse: "I will extol thee, O LORD; for thou hast lifted me up..." Psalm 30:1
